Pikangikum Water Project

Pikangikum is a remote fly-in First Nations' community in Northern Ontario, brought to international attention in 2010 as having the highest global suicide rate because of a wave of youth suicides. Youth suicide continues to be a major risk and concern. A supply of safe drinking/washing water and the provision of safe sewage disposal are essential requirements for health and hope in the community.

The Primate's World Relief and Development Fund is accepting donations for a Water Project in Pikangikum. To date, 14 homes in Pikangikum have been equipped with clean water, wastewater removal, and the skills training and jobs that go with the system. 10 of those homes were directly funded by PWRDF. In partnership with Habitat for Humanity Manitoba, work is now beginning on the next 10 homes. Immediate health and social benefits are experienced with clean water. In the words of one leader, it is a "return to dignity" to the most vulnerable people of Pikangikum".

The gift you have received is part of a nation-wide movement of concerned Christians to embody the hope, generosity, and world-changing power of Christmas.
